

# Heights Driving School Inc. Driver Evaluation Program

**Heights Driving School Inc.'s** Driver Evaluation Program helps individuals maintain driving independence, while promoting a safe driving environment. Each individualized driver evaluation is designed to measure a person's ability to safely operate a motor vehicle.

■ The program is valuable for individuals, family members and physicians to help determine an individual's ability to drive by providing a measurable and objective evaluation that includes:

- \* Vehicle modifications assessment
- \* Vision screening
- \* Reaction time analysis
- \* Perceptual motor abilities
- \* Cognitive skills
- \* Decision-making ability
- \* Upper and lower extremity range-of-motion and strength

■ A Board certified driver rehabilitation specialist administers tests. An objective, written summary of test results are provided to the referring physician, family member or caregiver with possible recommendations to help improve driving skills.

## Who Can Benefit From an Evaluation?

May include, but not limited to people with:

- \* Stroke, brain injury
- \* Orthopedic injury
- \* Arthritis
- \* Neurologic impairments
- \* Changes in medication
- \* ADD/ADHD

### Warning Signs of At-Risk Drivers:

- \* Memory loss
- \* Changes in neurological function
- \* Attention deficiencies
- \* Slow reaction time
- \* Changes in vision
- \* Changes in physical abilities
- \* Problems driving at night
